Artist Statement

I have given up the attempt to reject my theatrical nature, and have chosen to succumb to my need to entertain. I am neither a lawyer nor a musician like I thought I was; I am a thespian. As a child and young adult, I never chased the thought of "becoming an actress", because subconsciously I have always been an actress. The small skits I would perform with my friends and family would later be known as "the short plays that I wrote, directed, and starred in". HSPVA has given me the opportunity to explore the world I knew nothing about, but understood completely. The college I go to must not only educate and better me like my high school has, but also cater to my creative needs. I have discovered a lot of myself in high school, and I would love to learn more about me in college. It has taken me a while, but with the help of my family, friends, God, and HSPVA; I have accepted myself as an actress. Some people may say they discovered acting, but I believe acting discovered me.
